Please follow this measuring method: All measurements ± 1 cm

The following method is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.

IMPORTANT: All measurements measured without seat cushion!

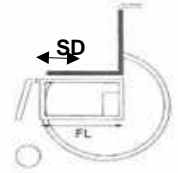

Seat width (SW):

- a) For the user: Allow space of sideguard to pass vertically between hip and sideguard on each side. (approx. 1 - 2cm altogether)
- b) On the wheelchair: From outside frame tube to outside frame tube.

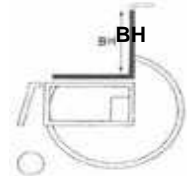

Seat depth (SD):

- a) For the user: When sitting upright: leave space for 2 - 3 fingers between front edge of the seat upholstery and back of knee. (approx. 3 - 6 cm). Care must be taken with adj. upholstery.
- b) On the wheelchair: From back tube to front of seat upholstery.

Back height (BH):

- a) For the user: Measured from the seat, including cushion, to **no more** than one finger (1-2 cm) below the shoulder blade. **Important:** The back height depends on the degree of the disability.
- b) On the wheelchair: From back of seat tube to upper edge of backrest upholstery. **Note:** The user's ability to sit upright has a major influence on the back height and it can therefore differ considerably.

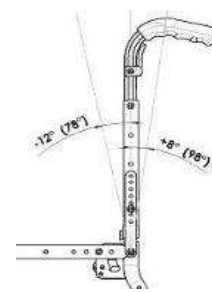

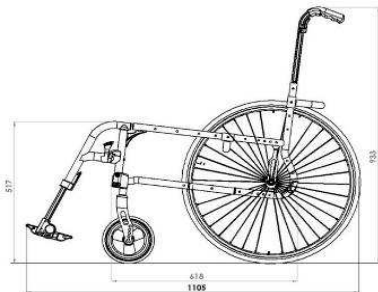

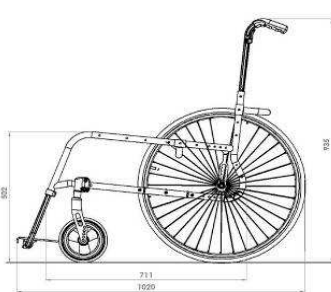

Lower Leg Length (LLL): measurements ± 2 cm

- a) For the user: With legs angled right, from back of knee to bottom of shoe sole.
- b) On the wheelchair: From front of seat to top of footrest. **Remember:** To include the cushion's height.

Technical Data Overview:

Setting of the chair below is: Seat Depth 50cm , front SH 49 cm, 6" castors and back SH 45 cm, 24" wheels

Fixed Front Frame

Swing-Away Frame

Back angle

- Overall width with: 24" rear wheel**
- For 0° camber: SW + 20 cm
 - For 2° camber: SW + 22 cm
 - For 4° camber: SW + 28 cm

Weights:
Minimum weight: approx. 11 kg
