|                        | Flease IC                         | ollow this measuring method:   |
|------------------------|-----------------------------------|--|
| The following meth     | nod is recommended on the basis o | f extensive practical experience. Deviations are possible in individual instances. |
| Seat width (SW):       |                                   |  |
| a) For the user:       | •                                 | eguard and hip on each side of the chair   |
|                        | (approx. 1 - 2 cm altoget         |  |
| b) On the wheelchair:  | From outside frame tube           | to outside frame tube.   |
| Seat depth (SD):       |                                   |  |
| a) For the user:       | When sitting upright: leav        | ve space for 2 - 3 fingers between   |
|                        | front edge of the seat up         | holstery and back of knee.   |
|                        | (approx. 3 - 6 cm). Care          | must be taken with adj. upholstery.  |
| b) On the wheelchair:  | From back tube to front of        | of seat upholstery.  |
| Front seat height:     |                                   |  |
| a) For the user:       | When sitting with 90° kne         | ee angle:  |
|                        | From back of knee to bot          | tom of shoe sole.  |
| b) On the wheelchair:  | From front of seat tube to        | o the ground.  |
|                        | (min. 3cm longer than us          | er measurement).   |
|                        | Remember to include the           | e cushion height.  |
| Rear seat height:      |                                   |  |
| b) On the wheelchair:  | From back of seat tube to         | o the ground.  |
|                        | Note: Max. seat he                | sight difference rear to front is 11 cm.   |
| Back height:           |                                   |  |
| a) For the user:       | From the seat, including          | cushion, to be no more than 1 - 2 cm below the lower shoulder blade.               |
| b) On the wheelchair:  | _                                 | o upper edge of backrest upholstery.   |
|                        |                                   | bility to sit upright has a major influence on the                                 |
|                        |                                   | and it can therefore differ considerably.  |
| Back angle:            | Important: The back heig          | ht depends on the degree of disability.  |
|                        |                                   | ground. Negative angles are <90°   |
|                        | and positive angles are >         |  |
|                        |                                   |  |
| Technical Data Overvie | w:                                |  |
| Max. overall height:   | 102 cm                            |  |
| Max. overall length:   | 115 cm                            |  |
| Max. pivot width:      | 70 cm                             |  |
| Max. safe slope:       | 7° (for use of parking bra        | kes)   |
| Wheelchair weight:     | from 11,5 kg                      |  |
| Dismantled weight:     | from 9,1 kg                       |  |

| Mass of heaviest part: | Camper                            |  |
| -                      | For 0° camber:                    | SW + 16 cm   |
| Mass of heaviest part: | •                                 | SW + 16 cm<br>SW + 22 cm   |

Intended use and environment - for people with limited mobility; self-propelling or being pushed by an assistant, indoor and outdoor use.

Product is crash tested according to ISO 7176-19 and therefore approved for transportation in a vehicle in combination with option "Tie down brackets for transportation". For transport without a user, fix the chair safely in the vehicle (e.g. car or plane).

All changes in the configuration might change the seat heights. Manufacturing tolerances of +/- 1 cm.
